

Eco 30 Compact

PEVEX ECO 30 Compact 1.5-4kW Multifuel Stove

The **Eco 30 Compact** 3-4kW multi stove is a British designed steel stove with a low height making it suitable for installation into a standard 16x22" fireplace opening. Designed very much with a contemporary feel, this stove offers an attractive yet practical solution to fit into the standard 22" height British fireplace.

The **Eco 30 Compact** features low profile styling, a large glass door for an uninterrupted view of the fire, primary and secondary air controls, tertiary air for clean burn performance, top and rear flue outlet, cast iron grate, high efficient vermiculite lined fire chamber and an output up to 4kW.

A beautiful and stylish British designed stove that will look wonderful in any fireplace setting.

The **Eco 30** is available with built in legs and as a convector stove option. Chrome handle is fitted as standard with black handle and knobs available to order as options.

ECO 30 Compact Convector

3kW Multifuel Stove

New March
2015

The **Eco 30 Compact Convector multifuel** stove is ideal for smaller rooms or where distances to combustibles surfaces is important. With a range output of 1.5-4kW, this small stove still packs a punch above its weight and will look stylish whether installed in a town house, country cottage, house boat or log cabin.

Designed with primary air control, secondary air wash to keep the glass clean and tertiary air for clean burn performance, this stove is easy to control whilst offering good heat output through its full convection casing. The complete convector casing ensures fast and efficient heat transference ensuring surfaces remain cooler which allows the stove to be placed closer to combustible surfaces whilst allowing you to enjoy the lovely cosy convection and radiant heat that it produces.
